SKILLS

CAREER OBJECTIVE

Develop software and web apps that are easy to use, functional, and accessible for all customers and other users of my applications. Solve consumer and business problems with full stack development tools that I possess.

WORK EXPERIENCE

Freelance Full Stack Developer

GeauxWeisbeck4

December 2021 - current / Raleigh, NC

- Design and develop web apps and software for small businesses and other entrepreneurs.
- Applied web developer bootcamp knowledge to design and develop a Martin Luther King Jr. Tribute website using HTML, CSS, and Bootstrap and published website on MLK Day.
- Utilized HTML, CSS, JavaScript, and educational resources to develop and design my full stack web development process.
- Designed and developed personal website using HTML, CSS, JavaScript, and innovation models from the Customer Centered Innovation Sprint by Section4.
- Developing software using Ubuntu Linux and continuing to learn more and research computer science daily to improve skills.

SOC Analyst

Iron Range Cyber

July 2021 - November 2021 / Raleigh, NC

- Monitored endpoints, performed security event triage, and responded to incidents while coordinating with team members and management to document and report incidents.
- Identified and remediated security issues with Malwarebytes, Witfoo, and IRIS and followed up by documenting incidents and reporting them to our clients.
- Scanned machines with Nessus and accessed our GUI to gain visibility into our client's networks in order to locate threat vulnerabilities and monitor activity.
- Administered client machines and maintained system software with Atera by creating and deploying scripts in PowerShell, remotely connecting to client sessions, and any other system tools.

Creative
Problem Solving
Communication Skills
Writing - Technical and Creative
HTML, CSS, Bootstrap
Adaptable
Organized
Compassionate
JavaScript(ES6, React, Redux, Node.js)

VSCode and Atom Text Editors
Cybersecurity
Teamwork

- Assisted clients by implementing best security practices to make recommendations, create monthly reports, and respond to any needs by effectively communicating via phone or email.
- Created and modified SOP procedures for a cybersecurity startup with team members.

PROJECTS

Personal Website

Owner/Developer

January 2021 - current

- Implement tools from Section4 Innovation Sprint in design of website design and full stack process.
- Redesign personal brand that will allow me to find Web Developer jobs, contracts, research, and other opportunities by utilizing a strong community.
- Keep followers and people in my community up to date with my work and what kind of knowledge I have in case they need my services.

Martin Luther King Jr. - Strength to Love Website

Designer/Developer

January 2021 - current

- Design a website as a tribute to the late Dr. Martin Luther King Jr. by creating a website on his book of sermons and other writings.
- Showcase my skills in HTML, CSS, Bootstrap, and JavaScript while also giving attention to a cultural icon.
- Analyze the writing to showcase my perspective on Dr. Kings writings.
