CAREER OBJECTIVE

Develop software and web apps that are easy to use, functional, and accessible for all customers and other users of my applications. Solve consumer and business problems with full stack development tools that I possess.

WORK EXPERIENCE

Freelance Full Stack Developer

GeauxWeisbeck4

📅 December 2021 - current 📍 Raleigh, NC

- Design and develop web apps and software for small businesses and other entrepreneurs.
- Applied web developer bootcamp knowledge to design and develop a Martin Luther King Jr. Tribute website using HTML, CSS, and Bootstrap and published website on MLK Day.
- Utilized HTML, CSS, JavaScript, and educational resources to develop and design my full stack web development process.
- Designed and developed personal website using HTML, CSS, JavaScript, and innovation models from the Customer Centered Innovation Sprint by Section4.
- Developing software using Ubuntu Linux and continuing to learn more and research computer science daily to improve skills.

SOC Analyst

Iron Range Cyber

📅 July 2021 - November 2021 📍 Raleigh, NC

- Monitored endpoints, performed security event triage, and responded to incidents while coordinating with team members and management to document and report incidents.
- Scanned machines with Nessus and accessed our GUI to gain visibility into our client's networks in order to locate threat vulnerabilities and monitor activity.
- Assisted clients by implementing best security practices to make recommendations, create monthly reports, and respond to any needs by effectively communicating via phone or email within 24 hours of any request.
- Authored monthly security analysis reports with 100% accurate reporting on security information such as incidents per month, locations of incidents, which software was most effective, and recommendations that could save companies millions of dollars in cybersecurity safety from ransomware attacks.

Personal Banker IV

SunTrust Bank

📅 April 2019 - June 2020 📍 Rolesville, NC

- Communicated proactively with 30+ clients, identifying financial goals and creating personal & business portfolios based on their specific needs
- Bolstered communication with clients to understand their specific needs, resulting in \$1.3M in annual incremental revenue

Birddog Distributing

📅 Oct 2017 - Feb 2019

📍 Raleigh, NC

- Collaborated with our advisory team to work cross-functionally with E-Commerce software and Inventory Purchasing Process to create our product inventory database which integrated with eBay, Google, Amazon, Birddogdistributing.com, Facebook, and other selling platforms to decrease inventory stockout costs by 75%.
- Handled product labeling, organization, and storage, increasing warehouse efficiency by 30%

PROJECTS

GeauxWeisbeck4 - Personal Brand

Owner/Developer

📅 January 2021 - current

- Expand tools from Section4 Innovation Sprint and implement 5 years of programming experience to create personal website and brand.
- Develop web apps and work on projects to constantly upgrade knowledge of JavaScript, Python, HTML, CSS, Bootstrap, MongoDB, Express.js, Angular.js, React.js, Node.js, Mongoose, Figma, Ubuntu & Kali Linux, Windows, MacOS, Postman, Twilio, and many other development and web security tools I have used.
- Organizing marketing channels by implementing Russell Brunson's Top 100 marketing strategy from his book "Traffic Secrets", which markets services and/or products through my list of Top 100 influencer people, companies, podcasts, books, etc.
