Product Innovation
Section4
2022 - 2022

Full Stack Web Developer
Bootcamp
Computer Science
Colt Steele Web Development
December 2021 - February 2022
Udemy

CAREER OBJECTIVE

Throughout my career as a front end developer I've emphasized the importance of scaleable and well documented code. I enjoy working collaboratively but can also run with projects on my own. Excited about the prospect of joining a product-driven company.

WORK EXPERIENCE

Freelance Full Stack Developer

GeauxWeisbeck4

December 2021 - current / Raleigh, NC

- Applied full stack boot camp knowledge to create a Martin Luther King Jr. Tribute website with HTML, CSS, and Bootstrap technologies and met personal deadline of releasing site by MLK Day 2022.
- Designed personal website and full stack process while enrolled in Section4 Customer Centered Innovation course to integrate course principles into design of my personal brand website and software creation process.
- Working on project to test theories I learned from Section4 innovation sprint using the technologies I have learned through research and web development bootcamp.
- Created entire personal website using HTML, CSS, and the M.E.A.N. stack to show knowledge in both front end and back-end processes.

SOC Analyst

Iron Range Cyber

July 2021 - November 2021 / Raleigh, NC

- Monitored endpoints, performed security event triage, and responded to incidents while coordinating with team members and management to document and report incidents.
- Identified and remediated security issues with Malwarebytes, Witfoo, and IRIS and followed up by documenting incidents and reporting them to our clients.
- Scanned machines with Nessus and accessed our GUI to gain visibility into our client's networks in order to locate threat vulnerabilities and monitor activity.
- Administered client machines and maintained system software with Atera by creating and deploying scripts in PowerShell, remotely connecting to client sessions, and any other system tools.

SKILLS

JavaScript (ES6, React, Redux, Node.js)
SQL (PostgreSQL, MySQL)
Cloud (GCP, AWS)
CI/CD
Typescript
